**February 07-08, 2025**

Hotel Radisson Blu, Dhaka, Bangladesh

## Welcome message

We are really thankful to all who have taken the pain to join today's 15th Bangla Interventional Therapeutics. At the same time, we acknowledge the contribution of those behind the previous successful BIT conferences. Since its inception in 2011 with a view to do innovation in the field of interventional cardiology, BIT has grown from a tiny tot to the present day's young adult over only fifteen years' time period.

BIT is one of the most open, friendly and dynamic symposia in Bangladesh, connecting interventional cardiologists around the world.

The organization has partnership and 'trade agreement' with US-based Transcatheter Cardiovascular Therapeutics (TCT), the biggest global forum for cardiology. TCT has been in collaboration with the BIT Summit since 2015 as a partner. In this year's summit, there will be joint sessions with American College of Cardiology, Sri Lankan College of Cardiology, Cardiac Society of Nepal, Asian Pacific Society of Interventional Cardiology (APSCI), EuroPCR and European Association of Percutaneous Cardiovascular Interventions (EAPCI). These six acclaimed organizations are also official partners of this year's BIT Summit.

The diverse flavor of scientific sessions and case presentations in previous conferences was a source of satisfaction to the majority of the participants. For this 2025 meeting the previous format will be maintained.

This time TRI, CTO, Complex PCI, CHIP, TAVI and Intravascular coronary Imaging & Physiology will be specially focused. Favorite topics like primary PCI, trans-radial intervention, left main interventions, intervention related to multi-vessel, bifurcation and carotid lesion, device closure of congenital heart disease will be covered. Innovation like TAVI will be covered as well. There will be arrangement for live transmission from the Cath lab. We are delighted to announce that the renowned interventional cardiologists will attend and deliver speech in this BIT meeting.

We are delighted to announce that this year 15th Bangla Interventional Therapeutics opening Speech will be delivered by The Hon'ble Chief Advisor of the People's Republic of Bangladesh Nobel Laureate Doctor Muhammad Yunus.

We are proud to bring you an exciting educational opportunity in these challenging times - all in one box, at your own pace, keeping you safe.

Let us have an informative, interactive and vibrant summit!
